Important Notes:

There are a lot of other recourses that explain these topics in a fun way so it's up to you to create your own path just do a search for understanding and practice more...

you are not committed with all these roadmaps to be followed literally or study all things inside as I said it's up to you but let it as a reference to back if needed or there is a misunderstanding

The purpose of these roadmaps is not to be confused with a lot of these resources or things you will study and off course we mention just learning fundamentals to do our project and let these resources to build a background later

Ways of learning

- Finding Right resources that won't make you hate these technology or feel boring
- The official documentation and/or standards for the technology (Recommended to open it always beside learning/coding)

- Questions & answers on Google, Stack Overflow, colleagues, qoura, reddit , or any other forums, blogs + online communities
- books from O'Reilly, Apress, or a similar publishers
- Tutorials
- All above + side project for practice

Ready Roadmaps

For no cs degree

- [Someone plan](#) for studying cs materials from universities like stanford taken from OSSU and other recourses
- [CS self study Plan](#)
- [A complete computer science study plan to become a software engineer.](#)
- [Someone plan](#) to be a programmer to improve his coding skills and ML

Web Skills

- Full guide for [useful skills to learn as a web developer](#)
- [This Article](#) is good to get small definitions of technologies

General Frontend

- [Frontend Developer](#)
- [frontend developers needs](#)

General Backend

- [backend Developer](#)

React Developer

- [react developer roadmap](#)

Angular Developer

- [Angular roadmap for 2018](#)

Vue Developer

- [Vue Developer](#)

Machine Learning Roadmaps

- [learning_path: Machine Learning for Software Engineers](#)
- [Roadmap to becoming a Machine Learning developer in 2020](#)
- [Machine Learning Engineer and learn by doing](#)
- [Deep Learning Papers Reading Roadmap](#)
- [Deep Learning roadmap](#)
- [NLP roadmap](#)

.Net Core Roadmaps

- [ASP.NET Core developer in 2019](#) this roadmap discuss the tools and framework you might need in building your software and some general concepts to understand
- [.NET and ASP.NET Core Roadmaps](#) this roadmap discuss the topics you need to know in every step or stage that your are learning now

Flutter Roadmap

- [flutter roadmap](#) that showing all concepts and other thing you must know

Android Roadmap

- [Android Roadmap](#) has guide to how to read
- [another roadmap](#) and for [recourses](#)

IOS Roadmap

- [IOS Roadmap](#)
- [another roadmap](#)

Go Developer

- [Go Developer Roadmap](#)

My Suggestions and Resources

-
-
-

Notice:

although all the above roadmaps in different fields and stacks and start from the beginning but I'm sure you notice a lot of things and topics common between them
